Asset validation failed (90046)
Invalid Code Signing Entitlements. Your application bundle's signature contains code signing entitlements that are not supported on iOS. Specifically, value '4245WA8N82.com.thegamecreators.agk2player' for key 'application-identifier' in 'Payload/My FC App.app/My FC App' is not supported. This value should be a string starting with your TEAMID, followed by a dot '.', followed by the bundle identifier. (ID: 55fabe7f-96d8-4435-98b1-3575561e2564)

Invalid Signature. Invalid Info.plist (plist or signature have been modified). The file at path "My FC App.app/My FC App" is not properly signed. Make sure you have signed your application with a distribution certificate, not an ad hoc certificate or a development certificate. Verify that the code signing settings in Xcode are correct at the target level (which override any values at the project level). Additionally, make sure the bundle you are uploading was built using a Release target in Xcode, not a Simulator target. If you are certain your code signing settings are correct, choose "Clean All" in Xcode, delete the "build" directory in the Finder, and rebuild your release target.
